Our Solutions

Mitiget, Helping Organizations Protect Sensitive Asset From Unauthorized Activities.

Nowadays, desired information is available at one's fingertips and accessible from anywhere at any time. As a result, data privacy and protection stand at great risk. We help to strengthen Cybersecurity capabilities by enabling effective identification of potential threats, incidents, and facilitating preventive action right in time. Our security professionals always provide clarity around security strategies, policies and awareness for the protection of asset and environment.

We also design and implement physical security systems and surveillance using a robust and reliable people, processes and technologies approaches for Schools, commercial area, Maritime, Aviation, Estates, Streets, Events, and so on.

Another aspect is the security of critical documents which is often overlooked and underrated in many organizations. While a strong, well-thought-out records management process can make your people and processes more effective and efficient, your critical information secure, bad practice can lead to theft, messy and incomprehensible workspaces irritable to employees, and loss of information.

Mitiget's information security and cybersecurity services encompass a holistic approach—right from detection to protection, prevention and remediation.

"It takes 20 years to build a reputation and few minutes of cyber-incident to ruin it."
*Stéphane Nappo*

All-in-one Cyber Protection Platform

Managing cyber protection in a constantly evolving threat landscape is a challenge. Safeguard your data from any threat with **Acronis Cyber Protect** – the only cyber protection solution that natively integrates data protection and cybersecurity covering Cybersecurity to beat any threat, Backup and recovery and Integrated protection management. These are the components:

Anti-malware and antivirus | Fail-safe patching | Forensic backup | Safe recovery | Continuous data protection | Global threat monitoring and smart alerts | Data compliance reporting and data protection map | Global and local allow lists from backups

Some platforms protected:
Workstation, Server, Virtual Host, Windows Server Essentials, Microsoft 365, Google Workspace

We see the potentials in the strategy of each of our clients and can help them mitigate uncertainties while harnessing opportunities by providing invaluable solutions that enable set objectives.

There Has To Be A Better Way For
Security, InfoTech, and Compliance.
Mitiget Delivers Simple Solutions To Complex Problems.

Records Security. Office Automation.

Disorganized documents and files are obvious symptoms of bad records management practices. Stacks of paperwork growing fast, disorganized documents making file sharing cumbersome, paperwork storage taking up too much office space, misfiled documents taking a significant amount of time to find and retrieve represent signs of bad practices.

This culture need to be changed and efforts ramped up to eliminate wastages and mitigate inherent risks in order to be competitive in this digital age. Mitiget is the answer.

Mitiget, Providing Best Practices and Policies To Ensure Security of Records and Compliance. We Do Documents Right!

We redefine document & records handling practice

Governance, Risk and Compliance (GRC) Solution

Survey has shown that many organizations run a disjointed GRC activities which cause several problems. In spite the effort to create functional areas to solve the challenging situation, they create siloed programs that even make them ineffective and yield troubling drawbacks such as high costs, lack of visibility into risks, inability to address third party risks, difficulty measuring risk-adjusted performance and too many negative surprises. Pictures below show organizations doing GRC wrong and right. At Mitiget, we help to confront and resolve GRC challenges across Africa using an end-to-end approach – People, Process and Technology.

GRC Done Wrong

GRC Done Right With A GRC Software

Mitiget's two approach solution

1. GRC Consultancy - Mitiget's GRC Consultancy Services Include:
- Creation of GRC Functional Areas With Processes and Policies.
- Set Up of Risk Assessment, and Internal Control Frameworks, Creation of Policies and SOPs, Gap Analysis, and Re-baselining.
- Security Configuration and Compliance, SLA's Service Delivery.
- Access Reviews, SDLC, ITSM.

2. GRC Software - The software features and modules include:
- Enterprise Risk Management (ERM), Internal Control and Compliance.
- Internal Audit, Incident and Non-Conformity Management.
- Policy and Documentation Management Tied to Process Visibility.
- Embedded Frameworks - ISO 22301/27001, PCI DSS, GDPR/NDPR.
- Asset Management and Tracking.

Our Solutions

**Mitiget, Transforming Education
Systems With Technology and
Automation**

Mitiget, Offering Quality and Innovative Technology For Education.

Technology is continually changing the way we work and play, create and communicate. So, it is only natural that advancements in digital technology are also creating game-changing opportunities in the world of education.

Hence, governments - at various levels, regulators, school management, education promoters and administrators, and teachers need to leverage the enormous possibilities in using modern learning facility and technology to enrich and stimulate young minds.

Whether it is the basic facility such as slide projectors, classroom film strips, virtual reality and next-generation e-learning, or assistive technology, virtual and augmented reality, high-tech collaboration tools, gamification, podcasting, blogging, 3D printing, artificial intelligence, personalized learning and much more are innovations in education that continue to evolve in exciting new ways — inspiring teachers and students alike.

At Mitiget, we design and deploy the most promising learning aids, edtech tools and technologies to help the stakeholders deliver educational mandate.

School's Computer Room

We design and implement a functional computer room for schools with facilities such as network connectivity, Wi-Fi/Internet, Computers, Laptops, Tablets, Screens, Projectors, Servers, printers, etc.

E-Library For Schools

We design and implement a functional digital library with custom furniture, computers, network connectivity, Wi-Fi/Internet, Computers, Laptops, Tablets, Screens, Projectors, Servers, e-textbooks, etc.

Classroom EdTech Tools

We supply and deploy EdTech tools such as Interactive Whiteboards, Multimedia Projectors, Visual aids, Audio aids, Audio-Visual aids, Cloud Base Language Laboratory, Live-Stream Multimedia, Wi-Fi/Internet, etc.

School Automation

We design and implement School Management Systems such as Web Portals/software for Administration and Student Management including Websites, Staff and Student Records, Exams and Results, Online Fees and Payment management.

"Example, not precept is the best teaching aid."

Physical Security and Surveillance For Schools

We design and implement surveillance systems for schools including CCTV, Access Control System, School Bus Trackers, Control Room, Fire Alarm Systems, Motion and Metal Detectors, Electric Fence, Security Governance. . .

Students' Cybersecurity Awareness

We design and run cybersecurity awareness program for students, teachers and administrators to proactively prepare them for the cyberworld risks such as dangers of free Wi-Fi, ATMs, and public computers that can lead to data compromise, financial loss, identity theft, and so on.

Teachers' Computer and EdTech Tools Training

We deliver computer and cybersecurity skill for teachers. This is to upskill those that have low proficiency and retrain those with skill on the use of computer-based technologies. Educators need to stay a step ahead to preserve their relevance in their career.

IT/Cybersecurity Governance For Schools

We help schools establish governance for their IT and Cybersecurity practices by setting up framework for the creation of learning value from IT investments and ensure that the right IT practices are adopted safety and security consciousness.

"A child miseducated is a child lost."

Do you have an effective strategy to handle interdependencies between corporate governance policies, regulatory compliance, and enterprise risk management programs? Is it really working?

At Mitiget, we support organizations to design and establish GRC strategies aimed to better coordinate processes, technologies, and people and ensure they act ethically and in an integrated manner.
